PRIVATE CLIMATE PROTECTION · GOTA

Your collection deserves more than *a garage*.

Climate protection for the cars you'll never replace. Precision service for your garage's mini-split system — engineered for owners who expect their systems to simply work, and their investment to stay pristine.

WHY IT MATTERS

In Texas, the threat isn't the drive. It's the storage.

A climate-controlled garage is only as good as the system running it. When that system drifts out of spec, the damage is silent, gradual, and expensive — and it lands on the one asset you can't simply replace.

Humidity & Condensation

Trapped moisture invites surface rust, brake corrosion, and mold on interiors and leather.

Heat Swings

An underperforming unit lets temperatures climb, degrading paint, seals, fluids, and electronics.

Silent System Decline

Dirty coils and loose connections cut capacity long before the unit ever "fails."

A replacement mini-split system runs **\$8,000–\$15,000**. A humidity-damaged collection costs far more. Protecting all of it starts at about **\$2 a day**.

MEMBERSHIP

Choose Your Level of Protection

Three memberships. One standard of care. Billed annually — framed monthly for simplicity.

Signature

Essential annual protection for a single-system garage.

\$37 /mo

\$444 billed annually · 1 service visit

EVERY VISIT

What a Precision Service Includes

Every line item performed by a licensed technician — every component chemically cleaned and disinfected. No shortcuts, no skipped steps.

DEEP CLEAN & DISINFECT

Condenser & evaporator coils

Chemically cleaned so your system holds full cooling capacity — and your cars stay cool.

Full head-unit disassembly

Housing and filters cleaned on every indoor unit — no trapped mold or odor.

Anti-algae drain treatment

Prevents blockages and water damage to your floor and what's parked on it.

PERFORMANCE VERIFICATION

Refrigerant & integrity check

Confirms the system is sealed and performing to spec.

Delta-T performance test

Measures real cooling output — proof your garage holds its climate.

Full operational test

Every mode, zone, remote, and thermostat verified.

MECHANICAL INTEGRITY

Connection tightening

Loose connections are the #1 cause of preventable failure — we catch them early.

Line set & insulation check

Protects efficiency and prevents condensation drips.

Floor protection guaranteed

RamBoard and blankets down before we touch a thing.

The White-Glove Guarantee

If you're not completely satisfied with your service, we'll make it right — or refund it. Your floor is protected before we begin, your report is delivered after we finish, and you're kept informed the entire time. No surprises. No mess. No exceptions.

"They treat my garage like I treat my cars. The report after every visit gives me total peace of mind — I never think about the climate system, which is exactly the point."
